LeetCode

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java

Front-end: React.js, Next.js, React Native, Tailwind

Back-end: Node.js, Express.js

Database: MongoDB, PostgreSQL

Developer Tools: Docker, Git, GitHub, AWS, Linux

Core Concepts: Data Structures & Algorithms, OOP, REST APIs, Debugging,

SOFT SKILLS

Problem Solving, Debugging, Cross-team Collaboration, Technical Communication, Adaptability

EXPERIENCE

Application Developer Intern (Android / Full-Stack), DBS Tech India Bank

June 2025 – Present

DBS is a Singaporean multinational banking and financial services corporation

Hyderabad, India

- Selected for the **CBGT Digi** team to work on banking application development.
- Currently training in Android development using **Kotlin, Java, and XML**, with exposure to **MVVM** and **MVP** architectural patterns.

Full-Stack App Developer, Be Offline

Dec 2024 – June 2025

Building a community app that uses real-life experiences to connect users

Bangalore, India

- Led a full frontend revamp of the mobile app using **React Native**, enhancing UI/UX and boosting user engagement.
- Built **25+** user-facing features with **Zustand** and **React Query**, increasing daily active users by **22%** through performance optimization.
- Programmed and deployed **AWS Lambda**-based background job system using cron expressions for scheduled tasks.
- Conducted **50+** code reviews on frontend and backend pull requests, ensuring consistency and enforcing **TypeScript** best practices.
- Performed feature-level **testing and debugging** to ensure application stability and smooth production releases.

PROJECTS

Rheoma – Workflow Automation Platform | *Next.js, TypeScript, Inngest, tRPC, Prisma, PostgreSQL* | Live Link

- Developed a no-code, event-driven workflow automation platform with a visual editor that allows users to connect triggers, actions, and control nodes.
- Introduced asynchronous workflow execution using **Inngest** background jobs to queue and orchestrate running workflows, preventing request blocking and improving system responsiveness.
- Architected a modular node execution engine supporting multiple node types, including **Trigger Nodes** (webhooks, manual), **Integration Nodes** (Discord, Slack, LLM calls), and **Control Nodes** (HTTP, Split, Limit).
- Implemented execution tracking with step-level status propagation, retries, failure handling, and persistent workflow state using **Inngest**.
- Integrated type-safe APIs using **tRPC** to enable end-to-end typed communication between frontend and backend.

RTDE (Real-Time Document Editor) | *Next.js, TypeScript, Express.js, MongoDB, Y.js, WebSocket* | GitHub Link

- Engineered a responsive collaborative text editor with Google authentication via **Passport.js**, designed to support secure access.
- Applied design enhancements, including intuitive navigation controls and robust security protocols through Google authentication integration.
- Utilized **Y.js** and **WebSocket** to synchronize edits in real time, maintaining data consistency and reducing latency to under **100ms** during testing.

EDUCATION

Vellore Institute of Technology

Chennai, India

B.Tech in Computer Science Engineering (CSE)

2022 - 2026

- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

AWARDS AND HONORS

IEEE Yesist 2024 Finalist

International Talent Competition for Social Innovation using Sustainable Technology
